Used to represent the terms applied in their native languages by North American Indians to denote any object or ceremony supposed by them to possess a magical influence; a spell, charm, fetish; sometimes = MANITOU. Hence used, by later writers, to express the same or similar meanings as current among other savage peoples.

As savages usually regard the operation of medicines as due to what we should call magic, it is probable that their words for magical agencies would often be first heard by civilized men as applied to medicine, and hence it would be natural that 'medicine' should be regarded as their primary sense

-ment (mĕnt), *suffix*, forming sbs. Originally occurring in adopted Fr words in *-ment*, either representing Latin sbs. in *-mentum*, or formed in Fr on the analogy of these by the addition of the suffix to verb-stems The Latin *-mentum* was added to verb-stems, and the resulting sbs sometimes expressed the result or product of the action of the verb, as in *fragmentum* fragment, and sometimes the means or instrument of the action, as in *alimentum* aliment, *ornāmentum* ornament In late popular Latin, and hence in French, the suffix, while retaining its original functions, came (through sense-development in some of the older words) to be also a formative of nouns of action. In AF. the suffix was still more frequently employed than in continental OF. Of the many words in *-ment* adopted into English from French, some have concrete senses, as *garment*, *habilement*, the majority are nouns of action, as *abridgement*, *accomplishment*, *commencement*. In most of the instances the Fr. verb has been adopted into English as well as the sb derived from it. Hence the suffix came to be treated as an English formative. Early examples of its use as appended to native English verb-stems are *onement* (Wyclif's rendering of L. *unio*), and *hangment* (in the Promptorium *c* 1440 given as the equivalent of L *suspendium, suspensio*). In the 16th c the suffix was very freely added to English verb-stems, not only to those of Romanic etymology (as in *banishment, enhancement, excitement*), but also to those of native origin; examples of the hybrid formations of this period still surviving in use are *acknowledgement, amazement, atonement, betterment, merriment, wonderment*. Since the 16th c. many new derivatives in *-ment* have been formed from verbs of obvious French origin. Among verbs of native English etymology, those with the Romanic prefix *en-* (*em-*), and those with the native prefix *be-*, seem to have given rise to derivatives of this form with especial frequency · examples are *embankment, embodiment, enlightenment, entanglement*; *bedazzlement, bedevilment, bedragglement, bereavement, beseechment, besetment, bewilderment* Of formations in *-ment* from other native verbs there are few instances since Shakspere's time. It is rarely that the suffix has been appended to any other part of speech than a verb, as in *funniment, oddment*.

The letter *y* (after a consonant) ending a verb is changed into *i* when the suffix is appended, as in *accompaniment*.

A. *adj* Of or belonging to the Old English kingdom of Mercia or its language.

Although the political limits of Mercia were different at different periods, it may broadly be said to have occupied the middle of South Britain, between Deira on the north and Wessex on the south, and between Wales on the west and Lindsey and East Anglia on the east. The Mercian dialect of Old English belongs to the Anglian (as opposed to the Saxon) division, and is the dialect from which modern standard English mainly descends

1. The blackbird, *Turdus merula. arch.*

Perhaps never in popular use, but constantly occurring in Scottish poetry from the 15th c. Drayton adopted from some Scottish poet the traditional association of 'mavis and merle', which he frequently repeats, and which in the 19th c. often appears in English and American poetry from imitation of Scott or Burns. As used by Caxton and perh. by Philemon Holland, the word is an independent adoption from French

The transition from the assumed original sense 'short' to the OE. sense 'pleasant' is somewhat difficult, but may have been brought about through the intervention of a derived factitive verb, meaning 'to shorten', and hence 'to shorten time', 'to cheer', cf ON *skemta* to amuse, f. *skamt*, neut of *skammr* short.]

Merry-andrew, Merry-Andrew (me rĭ-æ·ndrʉ). [app. f. MERRY *a.* + *Andrew* proper name (cf. ANDREW 2).

Hearne's statement, in the preface to his edition of Benedictus Abbas (1735) that 'Merry Andrew' was originally

applied to Dr. Andrew Borde (died 1549) has neither evidence nor intrinsic probability, though Borde had a reputation for buffoonery, as is shown by the traditional attribution to him of various collections of jests. In 1668-9 29 Aug Pepys says that he saw at Bartholomew Fair a ridiculous play called 'Marry Andrey', but that this title has any connexion with *merry andrew* is very doubtful.]

Messiah (mesəi ă). Forms: α. 4 **Messie,** 4-5 **Messye,** 5 **Messy, Messe, Myssye**; β. 3 **Messyas,** 4-8 **Messias,** γ. 7 **Messiah.** [The α forms are a. F. *Messie*, ad. L. (Vulg.) *Messiās*, a. Gr. Μεσσίας, ad. Aramaic מְשִׁיחָא *m'shīhā*, Heb. מָשִׁיחַ *māshīaḥ* anointed (in the LXX rendered Χριστός, Christ), f. מָשַׁח *māshaḥ* to anoint. These forms do not occur in any Eng. transl. of the Bible, though common in other literature down to the 15th c. The form *Messias* was used in John i. 41 and iv. 25 (the only passages in which the word is found in the Gr. or Latin N.T.) by Wyclif after the Vulgate, and by later translators from 1526 to 1611 directly after the Greek. The form *Messiah*, invented by the translators of the Geneva Bible of 1560, is an alteration of the traditional *Messias*, intended to give it a more Hebraic aspect (the translators having on principle eliminated the Græcized forms of proper names from the O.T., though retaining them in the N.T.). In the Bible of 1611 it was adopted in Dan. ix. 25, 26, and although it occurs in no other passage of the 'Authorized Version', it eventually became the only current form. The Revisers of 1880-84 have substituted it for *Messias* in the two N.T. passages, but on the other hand have removed it from its original place in Dan. ix, where they read 'the anointed'.] The Hebrew title (='anointed') applied in the O.T. prophetic writings to a promised deliverer of the Jewish nation, and hence applied to Jesus of Nazareth as the fulfilment of that promise. (Chiefly preceded by *the* or defining word, exc. in the three Bible passages and sometimes in poetry, where it is treated as a proper name.) Hence *transf.*, an expected liberator or saviour of an oppressed people or country. (Written with capital M.)

‖ **Meta** (mī·tă) *Rom. Antiq* Pl. metæ (mī·tī) [L. *mēta*] One of the conical columns set in the ground at each end of the Circus, to mark the turning-place in a race. Hence *transf.* A boundary.

Meta- (me·tă), *prefix*, before a vowel normally **met-** (also before *h*, the resulting *meth-* being pro-

nounced mep), repr Gr. *μετα-*, *μετ-* (*μεθ-*), which occurs separately as the prep. *μετά* with, after, etymologically corresponding to MID *prep* In Gr the prefix is joined chiefly to verbs and verbal derivatives, the principal notions which it expresses are . sharing, action in common; pursuit or quest; and, especially, change (of place, order, condition, or nature), corresponding to L. *trans-* In some few formations *μετα-* represents the prep *μετά* in syntactical combination, with the sense after or behind, as in *μετάφρενον* METAPHRENON.

The words derived from Gr. words containing the prefix, or from assumed Greek types normally constructed, are given in their alphabetical place The words enumerated in this article are modern formations, in which the prefix is employed in ways not strictly in accordance with Greek analogies The prefix is often hyphened, and the *a* remains unelided before a vowel or *h*.

1. The supposed analogy of METAPHYSICS (misapprehended as meaning 'the science of that which transcends the physical') has been followed in the practice of prefixing *meta-* to the name of a science, to form a designation for a higher science (actual or hypothetical) of the same nature but dealing with ulterior and more fundamental problems. **Metache mistry** ? *nonce-wd*, the chemistry of the supersensible. **Metamathema tical** *a.*, beyond the scope of mathematics. **Metamathema tics**, 'the metaphysics of mathematics; the philosophy of non-Euclidean geometry and the like' (*Cent. Dict.* 1890) **Metaphysio logy**, a name invented by G H. Lewes for a doctrine of life and vital phenomena which should base itself on principles outside of and higher than those of physiology and the material organism, hence **Metaphysiolo gical** *a*, **Metaphysio logist. Metatheo logy** *nonce-wd.*, a profounder theology than that recognized by divines. Similarly in **Metae lement, Metagno stic** *a* [cf GNOSTIC *a*], **Metaorganism** (see quots.); **Metapheno menal** *a*, existing behind phenomena. See also META-GEOMETRY, METEMPIRIC.

6. In *Chemistry* a. *Meta-* is used to designate compounds derived from, metameric with, or resembling in composition those to the names of which it is prefixed, as *metachloral*, METALDEHYDE, etc. More systematically, it is used to distinguish one class of acids and their corresponding salts from another class (the ORTHO- acids) consisting of the same elements in different proportions, the *meta-* acids containing one, two, or three molecules of water less than the *ortho-* acids; the salts of these acids have names formed by replacing *-ic* by *-ate.* (A few of these compounds will be found in their alphabetical place; the most important of those remaining are placed below.)

The use of the prefix in chemistry was first introduced by Graham in. 1833 (*Phil. Trans.* 253)' see METAPHOSPHATE, METAPHOSPHORIC. The more definite use (correlated with *ortho-*) was introduced by Odling in 1859

1. Any member of the class of substances represented by gold, silver, copper, iron, lead, and tin. Originally this class was regarded as including only those bodies together with certain alloys (as brass and bronze), and hence as definable by their common properties, viz. high specific gravity and density, fusibility, malleability, opacity, and a peculiar lustre (known specifically as 'metallic'). In process of time other substances were discovered to have most but not all of these properties; the class was thus gradually extended, the properties viewed as essential to its definition becoming fewer. From the point of view of modern Chemistry, the 'metals' are a division (including by far the greater number) of the 'elements' or simple substances. Among them are all the original (simple) 'metals'; of the later additions to the list some possess all the properties formerly viewed as characteristic of a metal, while others possess hardly any of them; the 'metallic lustre' is perhaps the most constant. By some chemists the radical ammonium (NH_4) and derivatives thereof have been designated as 'metals', on account of the analogy of their compounds with those of the metals potassium and sodium.

In popular language the term is not applied to a metallic element when in such a state of combination that its identity is disguised. (Cf. METALLIC *a.* 2.)

Metaphysics (metăfi·ziks), *sb pl* [pl. of METAPHYSIC *sb*, repr. med L. *metaphysica* (neut. pl), med.Gr (τὰ) μεταφυσικά (neut. pl.), an alteration of the older τὰ μετὰ τὰ φυσικά, 'the (works) after the Physics' (cf. META- and PHYSICS), the title applied, at least from the 1st century A D, to the 13 books of Aristotle dealing with questions of 'first philosophy' or ontology

This title doubtless originally referred (as some of the early commentators state) to the position which the books so designated occupied in the received arrangement of Aristotle's writings (τὰ φυσικα being used to signify, not the particular treatise so called, but the whole collection of treatises relating to matters of natural science). It was, however, from an early period used as a name for the branch of study treated in these books, and hence came to be misinterpreted as meaning 'the science of things transcending what is physical or natural' This misinterpretation is found, though rarely, in Greek writers, notwithstanding the fact that μετα does not admit of any such sense as 'beyond' or 'transcending' In scholastic Latin writers the error was general (being helped, perhaps, by the known equivalence of the prefixes *meta-* and *trans* in various compounds), and in English its influence is seen in the custom, frequent down to the 17th c, of explaining *metaphysical* by words like 'supernatural', 'transnatural', etc]

Metely, obs. form of METELY *a* and *adv*

Metembryo (metembrio) [f META- + EMBRYO] The gastrula stage of a metazoon.

1887 HYATT in *Proc Boston Soc Nat Hist* 397 The proper name for these stages would be Metembryo, in allusion to the fact that the ovum at this stage is probably essentially a Metazoon

Hence **Metembryo nic** *a*, 'of or pertaining to a metembryo' (*Cent Dict.* 1890).

Metempiric (metempirik) [f META- + EMPIRIC.

Introduced, together with the related words, by G H Lewes in 1874]

1. (Also **Metempirics** with sing construction cf. *metaphysic, metaphysics*) The philosophy of things that lie outside the sphere of knowledge derived from experience

The writers quoted differ greatly in their application of the term, but the question between them is what is meant by 'experience'; the definition given above would be accepted on both sides.

1874 LEWES *Probl Life & Mind* Ser I I 18 Metempirics sweeps out of this region in search of the *otherness* of things *a* 1881 A BARRATT *Phys. Metempiric* vi (1883) 130 Any metempiric which does more than numerically multiply, or vary in degree, existence such as we have it in experience, or which postulates beings whose qualities bear no resemblance to those of experience, must be at once rejected

2. One who believes in or supports metempirical philosophy, a metempiricist.

a 1881 A BARRATT *Phys. Metempiric* iii. (1883) 19 Every man who believes in the consciousness of his fellows—every man who uses the word 'we'—is a Metempiric 1882 in OGILVIE, and in later Dicts.

Metempirical (metempirikăl), *a* [f. META- + EMPIRICAL] Pertaining to matters outside the range of knowledge derived from experience Also, of opinions and their advocates: Maintaining the validity of concepts and beliefs based otherwise than on experience.

1874 LEWES *Probl. Life & Mind* Ser I. I 17 If then the Empirical designates the province we include within the range of Science, the province we exclude may fitly be styled the Metempirical *a* 1881 A BARRATT *Phys Metempiric* II (1883) 17 The simplest Metempirical assumption, and one made by every man, is that there *is* a Metempirical existence, that he and his own experience are not all that has ever existed 1888 *Athenæum* 11 Feb 184 It appropriated for empiricism doctrines hitherto the special property of metempirical schools.

Hence **Metempirically** *adv*, in a metempirical sense or manner

1884 *Spectator* 2 Feb 161 Every atom is 'metempirically', as he [*sc* Barratt] calls it—a centre of consciousness

Metempiricism (metempirisizm). [f. METEMPIRIC + -ISM] Metempirical philosophy.

-meter, in actual use commonly *-o·meter*, and in some later formations *-i·meter*, a terminal element in words denoting scientific instruments for automatically measuring something Many words with this ending, as *barometer, hydrometer, hygrometer, thermometer*, were formed in the 17th c, and represent mod.L forms in *-metrum* (F. *-mètre*, It *-metro*). In these early examples the ending is always appended to Gr. noun-stems, or combining forms in *-o*, and the mod.L. form shows that it was intended to represent the Gr μέτρον measure (see METRE ¹); the formation is irregular, as the Gr word does not occur in combination with sbs, and would not correctly express the required notion of 'instrument that measures'. In the 18th and 19th c. many additional words were formed with this ending on Greek bases, as *actinometer, anemometer, chronometer, eudiometer*, etc Near the end of the 18th c. hybrid formations began to be introduced (many of them first occurring in Fr) In some of these the form of Greek compounds is imitated, as in *gasometer, galvanometer, alcoholometer, lactometer, pedometer*, in others the combining-vowel *i* of the Latin first element is retained, as in *calorimeter, gravimeter, densimeter, velocimeter*. In some late formations *-meter* is appended to modern words without any attempt to assimilate the form of the first element to that of a Gr or Latin combining form, as in *voltameter, ammeter* Cf. also the names of electrical measuring instruments mentioned under METER *sb* ³ 1 b, which might perhaps be more correctly viewed as examples of the suffixed *-meter* than as examples of the sb with defining word

Jocular nonce-words in *-ometer* have been frequently formed, chiefly in imitation of Sydney Smith's FOOLOMETER, with the sense 'a means of measuring or ascertaining the opinion or prevalent

character of some class of people'; also occasionally in names of imaginary instruments for measuring the amount or degree of something, as in *obscenometer* Similar hybrid formations have sometimes been adopted as trade names for certain instruments, e g *comptometer* [F. *compte* account], a kind of calculating machine, *distance-ometer*.

Methinks (mɪθɪ ŋks), *impers. v.* Now *arch.* and *poet.* Pa t **methought** (mɪθɒ̄t). Forms: see below and cf THINK *v*[1] [OE *mé þyncþ* (pa t. *mé þúhte*), where *mé* is dative, and *þyncþ* the 3 pers. sing of *þyncean* to seem: see THINK *v*[1]

As THINK *v*[1] did not, exc. in this phrase, survive beyond the 14th c, and had no very wide currency after 1250, the syntax of *methinks* became obscure. Hence it underwent various alterations of form. The verb being supposed to be THINK *v*[2], it followed that it ought to be in the first person, hence the form *me think* in which probably the pronoun was still correctly apprehended as a dative. In the 16–17th c there occur the forms *my think, my thought(s,* which are attempts to obtain a normal syntax by taking *think, thought,* as sb. The curious form *methoug'hts,* used in the 17th and the first half of the 18th c, probably owes its *s* to the analogy of the present tense *methinks.*]

It seems to me. (Used with dependent clause or parenthetically.)

According to Celsus, the members of this school (called in Latin *methodici*, in Gr *μεθοδικοί*) differed from the Dogmatic school in basing their treatment not on principles deduced from a classification of diseases according to their origin, but on the theory that morbid conditions consisted either in 'looseness', 'tightness', or a mixture between the two (*fluens, strictum, mixtum*), each of the three states having its appropriate set of remedies. The founder of the school was Themison, about A D 100.

4. a. Originally, a term applied to the members of a religious society (nicknamed 'the Holy Club'), established at Oxford in 1729 by John and Charles Wesley and other members of the University, having for its object the promotion of piety and morality, subsequently applied to those who took part in or sympathized with the evangelistic movement led by the Wesleys and George Whitefield. b. In later use, a member or adherent of any one of a number of religious bodies or denominations which originated directly or indirectly from the labours of the Wesleys and Whitefield.

In England, the designation belongs especially to the members and adherents of the Wesleyan-Methodist Society founded by John Wesley, and of the various other bodies that have proceeded from it or from each other by succession, as the New Connexion Methodists, the Primitive Methodists, the United Methodist Free Church, and others All these bodies accept in the main the Arminian theology of Wesley, and in nearly all of them the ministers (called 'travelling preachers') change their place of abode after a certain period (usually three years' In the U S the most influential body of Methodists is the Methodist Episcopal Church, which was directly founded by John Wesley (who ordained its first bishop, Dr Coke), and which is recognized by the English Wesleyan-Methodist Society as in full communion with it There are also several other bodies in the U. S. that adopt the name as a part of their official designation In Wales the name 'Methodists' commonly denotes the body more fully known as 'Calvinistic Methodists', which was founded by Welshmen influenced by the teaching of Whitefield, it is now federated with the United Free Church of Scotland and the Presbyterian Church of England
